[Guide to the OF5 Alorese File]

[The three sources in this file are all by Cora DuBois, a professional ethnologist who did field work in the area. DuBois was primarily oriented toward understanding psychological factors concerned with child training and related matters. No attempt was made to present a complete view of the culture, though a considerable amount of incidental information bearing on economic base, social organization and the life cycle is included. It is hoped that a Dutch work by Nicolspeyer, (De Sociale Structuur van een Aloreesche bevolkingsgroep, Leiden, 1940) can be added to this file in the near future.]
